Shelf life	8 month for white ink, other colors 1 year

Method of use

Our Product Introduction

1. Press the fabric surface: press the fabric at 165-200°C for 3-5 seconds.
 2. Spray pre-treatment liquid: spray a layer of pre-treatment liquid evenly where the pattern needs to be printed (spraying amount: evenly wet the surface of the cloth, just touch the wet feeling)
 3. Drying and printing: after the pre-treatment, put on the isolation paper and press it for 10-30 seconds, and press it dry
 4. Printing ink: after blanching and drying, the cloth can be printed on the machine, first printing white ink and then printing color ink, namely the finished product (please do not move the cloth from white ink to color ink to prevent dislocation.)
 5. Baking and fixing color: after the printing is finished, place the cloth on the ironing machine and press it gently at 180°C for about 20 seconds.
- Different fixation time and temperature depends on the thickness of the cloth, users should use their own Settings
Prepare the test, and finally determine the temperature and time

Product overview

- * add cross-linked fixative to make it highly adhesive with the adhesive, so as to improve the adhesion with textile fiber
 - * wide color range, natural transition, suitable for silk, cotton and other kinds of direct printing of textiles
 - * color fastness grade 6, washing fastness grade 4-5
- Waterproof, scratch resistant, high washing fastness, ink printing process is simple, no pre-treatment.
- * non-toxic and environmental protection, can directly contact the skin specially tailored for "pure cotton fabric", suitable for all textile cotton products direct printing.
