Product Description:

Our Single PASS UV ink boasts excellent adhesion, ensuring that your prints will adhere strongly to the printing surface. You can be confident that your prints will come out looking sharp and crisp, with no smudging or smearing.

Water resistance is also a noteworthy feature of this product. Our Single PASS UV ink is specially formulated to resist water, ensuring that your prints will not be damaged or ruined by water exposure. This makes it an ideal choice for printing labels and packaging that may be exposed to moisture.

This UV ink for single pass printer has a high scratch resistance, making it perfect for printing on materials that are prone to scratching. Your prints will remain intact, even if they are subjected to rough handling or friction.

With its long-lasting durability, the Single PASS UV ink is the perfect choice for those who require prints that will last. You can be confident that your prints will maintain their quality and vibrancy over an extended period of time.

Overall, our Single PASS UV ink is a high-performance UV ink that is perfect for all your single pass printing needs. Its excellent adhesion, water resistance, high scratch resistance, and long-lasting durability make it an ideal choice for all your printing requirements.

Features:

Product Name: Single PASS UV ink
Drying Time: Instant
Printhead: RicohG5/G6/Seiko/Konica
Gloss: High Gloss
Scratch Resistance: High
Package: Carton Package
Features:
High-speed UV ink
Rapid cure UV ink
High performance UV ink

Technical Parameters:

Parameter	Description
Product Name	Single PASS UV ink
Color	BK/CY/MG/YL/WH/LM/LC
Scratch Resistance	High
Adhesion	Excellent
Opacity	High Opacity
Drying Time	Instant
Printing Type	Digital Printing

Gloss	High Gloss
Curing Method	UV Curing
Package	Carton Package
Type	UV Ink
Additional Information	Fast curing UV ink, Single pass printing UV ink

Applications:

With its compatibility with RicohG5/G6/Seiko/Konica printheads, this Single Pass UV ink can be used in a variety of printing scenarios. Whether you're printing on paper, metal, plastic or even glass, this ink can deliver high-quality prints with a high gloss finish. The curing method used is UV curing, which ensures that the ink dries quickly and can be used immediately after printing.

This Single Pass UV ink comes in several colors such as BK/CY/MG/YL/WH/LM/LC, which means that you can create stunning prints that are eye-catching and vibrant. The high gloss finish adds an extra layer of sheen to the prints, making them stand out even more.

One of the best things about this Single Pass printing UV ink is that it can be used in a variety of product application occasions and scenarios. It is perfect for printing on food packaging, labels, posters, banners, and even on textiles. The fast-curing UV ink makes it an ideal option for printing on time-sensitive materials such as perishable food items.

At a delivery time of just 7 days, this Single Pass UV ink is a reliable option for your printing needs. Its affordability, compatibility, and quality make it a popular choice for businesses and individuals alike. Try it out for yourself and experience the wonders of Single Pass UV-curable ink!

Customization:
