Product Description:

Tucaí®
图彩

These inks are specifically designed for use with Toshiba CE4 and Ricoh G4G5G6 printheads. This ensures that the ink is compatible with your printer and will produce the best possible results. Whether you are printing documents, photographs or graphics, Ricoh Ink will ensure that your prints are sharp, vibrant and eye-catching.

One of the key benefits of Ricoh Ink is its low odor. This makes it ideal for use in environments where strong odors may be a problem, such as schools, hospitals or offices. Additionally, the ink has a storage life of 1 year, ensuring that it remains usable for an extended period of time.

Overall, if you want to produce high-quality prints with your Ricoh Ink Printer, then Ricoh Ink Products are the perfect choice. With a range of colors, a large volume per bottle, compatibility with specific printheads, low odor, and a long storage life, these inks are the ideal choice for any printing project.

Applications:

Whether you need to print documents, graphics, or photographs, Sakata's Ricoh Ink is capable of producing high-quality results. Available in black, cyan, magenta, yellow, and white, this ink is perfect for a variety of printing applications.

One of the benefits of using Sakata's Ricoh Ink is its hard, neutral, or soft property. This allows you to customize your printing based on

the material you are printing on. Whether you are printing on paper, plastic, or another material, this ink will produce the desired result. With a storage life of one year, you can be sure that your ink will remain usable for an extended period of time. Additionally, with a delivery time of only seven days, you won't be waiting long for your product to arrive.

Some of the occasions and scenarios where Sakata's Ricoh Ink can be used include printing documents for personal or business use, printing marketing materials such as flyers or brochures, printing high-quality photographs, and much more. The ink's versatility and quality make it an excellent choice for a vast range of printing applications.
